Education

St. Olaf College <i>BA in Computer Science & Mathematics</i> Honors: Graduated <i>magna cum laude</i> (GPA: 3.89/4.00)	Northfield, MN, USA <i>Aug 2022 - May 2026</i>
DIS Denmark <i>Study Abroad Program: Artificial Neural Networks and Deep Learning</i>	Copenhagen, Denmark <i>Jan 2025 - May 2025</i>
UWC Maastricht <i>International Baccalaureate (IB) Diploma</i>	Maastricht, Netherlands <i>Aug 2020 - May 2022</i>

Skills

- **Languages & Backend:** Python, SQL (PostgreSQL), C, C++, Bash, R, FastAPI, Flask, REST APIs, OOP, Git/GitHub
- **Data Engineering & ML:** ETL Pipelines, Relational Modeling (Schema Design), Web Scraping, Apache Spark, Pandas, NumPy, TensorFlow
- **Infrastructure & Cloud:** Linux (Debian/Ubuntu), Docker, AWS (EC2, S3), Cybersecurity Fundamentals
- **Spoken Languages:** Portuguese (Native), English (Fluent), Spanish (Intermediate)

Projects

Graffiti Generator (GANs) (report)	Python, TensorFlow, Keras
• Engineered and trained Deep Convolutional Generative Adversarial Networks (DCGANs) integrated into an ETL data pipeline for parallel image processing. Optimized hyperparameters for complex mathematical models to maximize GPU memory efficiency and co-authored a comprehensive technical report covering system engineering and convergence metrics.	
Data Pipeline: Stardew Valley Wiki (GitHub)	Python, JSON, Matplotlib
• Developed an end-to-end data pipeline and predictive analytics model to evaluate crop profitability. Architected multiple object-oriented modular parsers for the automated extraction of semi-structured data, handled data processing with Python, structured outputs into JSON, and applied statistical simulations to model economic scenarios, generate visualizations, and analyze ROI.	

Experience

St. Olaf College (Tech Hub) <i>Technical Team Lead and Systems Administrator</i> <i>Systems and Support Technician (Intern)</i>	Northfield, MN, USA <i>May 2025 - May 2026</i> <i>Sep 2022 - May 2025</i>
• Provided technical mentorship and team leadership in hardware architecture, operating systems, and complex software troubleshooting. • Automated operational metrics collection and data pipelines by engineering custom Python scripts, reducing processing time by an estimated 40%. • Planned and executed the migration of critical academic workstations to the Debian Linux ecosystem, ensuring security compliance and system stability. • Developed low-cost embedded system solutions utilizing Raspberry Pi hardware and custom firmware optimization.	
St. Olaf College (IT Support) <i>IT Infrastructure and Network Technician</i>	Northfield, MN, USA <i>Sep 2023 - Dec 2024</i>
• Maintained enterprise hardware infrastructure, managed inventory databases, and resolved high-complexity support tickets under strict SLA frameworks. • Reduced Mean Time to Resolution (MTTR) by an estimated 20% by authoring comprehensive technical documentation and triage runbooks for the support team.	
St. Olaf College (Dept. of Computer Science) <i>Technical Teaching Assistant - Hardware Engineering</i>	Northfield, MN, USA <i>Aug 2024 - Dec 2024</i>
• Mentored undergraduate students in low-level computing paradigms, covering logic gate synthesis, hardware debugging, and Assembly language programming. • Conducted technical lab workshops focused on microarchitecture implementations and assisted students in debugging complex C codebases.	

Certifications and Competitions

MUDAC (Midwest Undergraduate Data Analytics Competition) <i>Completed a 24-hour data hackathon focused on feature engineering, real-time data cleaning, and predictive modeling on large-scale datasets.</i>	Participant - April 2024
